

# Integrated Management Platform

# IMP

Innovative System for LED Display Control

## Features

### Real-Time Monitoring and Precision Troubleshooting

- 24/7 instant status monitoring for all displays.
- Pixel-level defect detection and localization.
- Expedited maintenance task dispatch.

### Seamless Multi-Terminal Collaboration

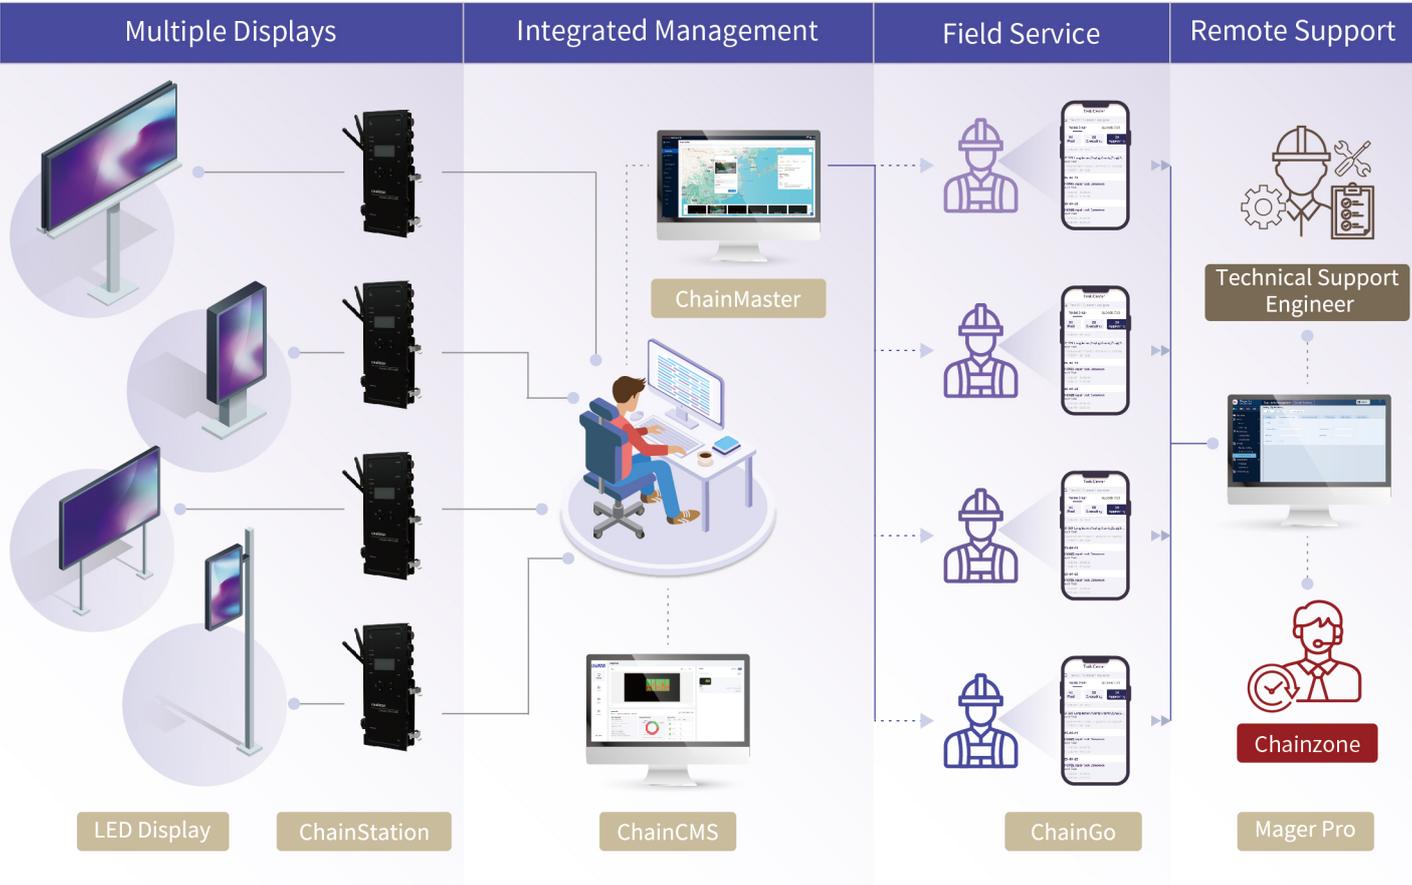

- Access and manage data across PC, web, and mobile terminals.
- Team collaboration and information sharing for efficient operations.

### Integrated Content and Device Management

- Centralized platform for both content publishing and device configuration.
- Effortlessly update display content and adjust settings remotely.

### Streamlined Field Service Management

- Efficiently assign and track on-site maintenance tasks via a mobile app.
- Technicians can access the displays via the well-integrated Remote Support tool.

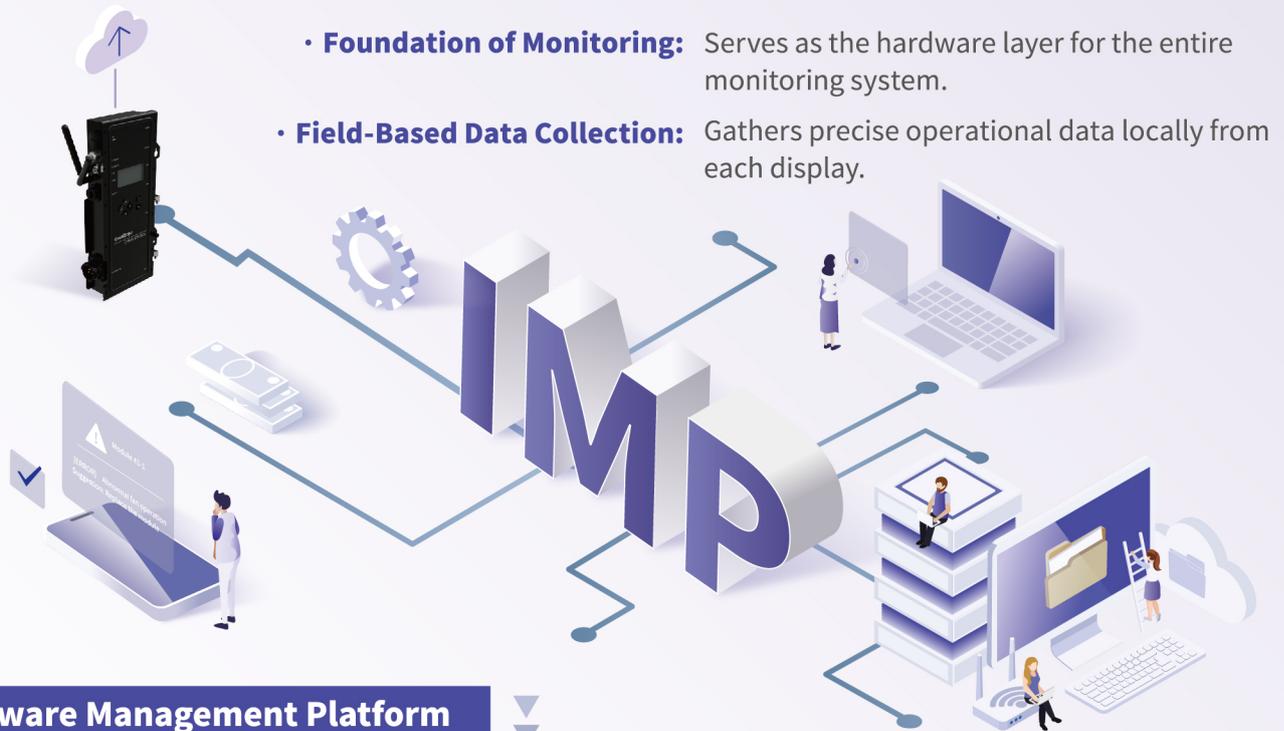

\*Local Servers or AWS: Choose based on your requirements.

# Operational Functions by IMP

## Functions

### Hardware Monitoring Platform: ChainStation

### Software Management Platform

#### ChainMaster—Integrated Operation Terminal

- **Centralized Monitoring Dashboard:** Provides a real-time, comprehensive view of all displays.
- **Instant Alarm Notifications:** Delivers immediate alerts for any system irregularities or failures.
- **Task Management:** Automatically suggests solutions and expedites maintenance task resolution.

#### Mager Pro—PC based Maintenance Terminal

- **Cloud Server Address Configuration:** Only required when configuring local servers.
- **Remote Support:** Responds to assistance requests from ChainGo.

#### ChainCMS—Content Management Tool

- **Content Publishing Management:** Schedule and publish media.
- **Multi-display Content Control:** Manages content distribution for Multi-display Systems.

#### ChainGo—Task Execution Terminal

- **Mobile Task Management:** Receives and manages on-site installation and maintenance tasks.
- **Fast Task Feedback:** Enables field technicians to provide quick, on-the-spot status updates.
